Garden Success

NEW
WASHINGTON
Red Raspberry

South Michigan Nursery
New Buffalo, Michigan.

Stromer's New WASHINGTON RED RASPBERRY

This new giant Red Raspberry has given universal satisfaction to commercial growers as well as home garden planters. One of the thriftiest growers of all Red Raspberries. Giant red berries are borne in clusters on canes that are twice as heavy as ordinary reds. Berries are thimble-shaped, and small seeded. All meat. Berries are produced over a long season, starting a little later than Latham, and after the main crop is harvested, the young canes will start to bear another crop for fall. Plants are strictly hardy, and very resistant to diseases. No matter how many varieties of Raspberries you already have, you should add a few WASHINGTON to round out your collection. Should be set 2½ feet apart in the row. Wait till spring to trim each year's growth back to 30 inches high. After main fruiting crop is over, prune out this part of the plant to make room for the new shoots that will bear the next crop. Do this each spring. A handful of commercial fertilizer, or a shovelful of manure around each plant during the winter months will do wonders within the next few months. Plants are still scarce, so we are offering 2-year-old fruiting-age, well rooted transplants.

THORNLESS!

Red Raspberry

**PLANT CANES ARE
SMOOTH AS A GRAPE VINE**

Canes are smooth as a grape vine. Absolutely thornless. This new early wonderful thornless Red Raspberry comes into bearing while Strawberries are still on, when Red Raspberries are selling at their highest prices. It's a week ahead of any other variety. Lengthen your fresh fruit season by adding a few plants of this Thornless to your collection. Berries are borne in large clusters, many ripe at one time. Fruit not quite as large as Washington, but just as sweet and good. Small seeds, and will not crumble when picking like so many early varieties. Excellent either eaten fresh, canned or fresh frozen. Keeps its color well. Plants a year old stand up stocky and sturdy like a little tree. THORNLESS plants are a scarce item.

Stromer's Raspberries

MORRISON Blackcap Raspberry

LARGEST BLACKCAP RASPBERRY GROWN—Berries as Large as a Quarter

Would you believe that there could be a Black Raspberry that would grow larger than the Cumberland? Well, there is one now called the Morrison Blackcap. This new variety was found growing wild in Girard, Penna., by County Agent Paul Crossman of Erie County. Mr. Crossman was attracted by its unusually large size, and its shiny jet black color. The berry is much larger than the Cumberland, many of them nearly an inch in diameter. Mr. Crossman says that the plants are very free from disease, and are vigorous growers. We have been fortunate in obtaining a limited amount of these plants for our own propagation purposes, but we are going to let a few of them go to our customers for 1947. Don't wait too long, as when our stock is sold, we will have to refund the money, and you will have to wait to get your start. MORRISON excels as a berry for both home and commercial planting. The large attractive berries meet all culinary requirements. They are high in quality, firm texture, juicy, not so seedy as other Blackcaps. MORRISON berries hold up longer in grocery and market displays. They will outyield other Black Raspberry varieties.

"Not just another Blackcap."

"Largest Black Raspberry I have ever seen."

"No diseased Morrison have been found to this date."

"The most promising late Black Raspberry growing at the New York Station."—Geo. L. Slate.

Look on page
10 for Cum-
berland Black
Raspberry.

Our Cumberland Blackcap listed on page 10 is reliable and good. Has been the outstanding commercial variety for many years. Now, however, Morrison comes along, and is just as much better in every way, that we are sure in a few years, everyone will be growing Morrison. It bears twice as many berries because the plants grow twice as large, and the berries are a third larger too. It is possible to pick 8 pints of berries from a single well-cared for plant, the second year after set, so you see you do not need to buy many for home use. At 30 cents per pint you can see it will pay you to buy a few plants and raise your own, and have fresh fruit and some to can. We have less plants to offer this year than last on account of labor shortage. We were unable to fill one-third of the orders last spring, so you know what to do. Don't overlook the 20% discounts for early orders.

STREAMLINER

THE *New* EVERBEARER

ENORMOUS SIZE
BUT NEVER HOLLOW

Brings Sensational Results

GEORGE STROMER

As proprietor of the South Michigan Nursery, Mr. Stromer closely supervises the filling and shipping of each and every order. His vast experience in nursery work is your assurance of quality and healthy, vigorous stock.

My son, J. D. Stromer, who has just received his honorable discharge on 98 points, is back on the job, having served 2½ years overseas, from North Africa, Casablanca, Tunis, Sicily, Normandy on D Day, Belgium and Germany. Was at the front when the war ended. Received six Battle stars, Bronze Medal, Purple Heart, Oakleaf cluster and others. I am very proud of my boy, and happy to have him back, to take active part in all the operations of the South Michigan Nursery.

**It Pays to Mail
Your Order Now**

20% discount will again be allowed for all 1947 fall orders. If this catalog reaches you after January, 1947, we will allow you 10 days' time to take advantage of the 20% discount. This is done to be fair to folks who ask for the catalog and receive it after discount dates.

Your order will not be shipped until you are ready for it in the spring.

We are always on the outlook for a better Strawberry, especially an ever-bearing variety. There are many very good varieties like Mastodon, Gem, Wayzata, and Minn. 1166 (Now named EVERMORE). They are all mighty good in every way. HOWEVER, we have never seen a more beautiful Strawberry than the STREAMLINER. It's almost round, with a small hull, and of enormous size. Even larger than the famous Mastodon. The STREAMLINER will ripen up even, to the prettiest bright scarlet color, which will attract customers' attention every time. Sweet as honey, with very little acid.

**BEARS 60 DAYS AFTER
SET**

Set STREAMLINER plants during March, April or May, and you will be picking those big, sweet juicy beauties 60 days later. Think of it—no waiting a whole year for berries. When late killing frosts come in October or November the plants will still be loaded with green and ripe berries, and even blossoms. It will take a good hard frost to stop them.

**BEARS 3 CROPS IN
18 MONTHS**

Then the following June, you will again harvest a full crop, just like an ordinary Strawberry, and with good care they will keep on bearing till late into the fall.

**STRONG, HARDY
GROWER**

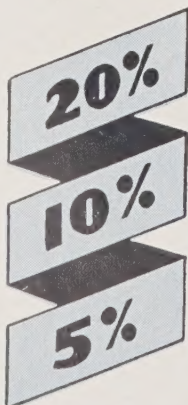

STREAMLINER is a thrifty, strong, and hardy grower. Does well on most any soil, and seems to do well in both wet and dry seasons. Perfect flowering, and needs no other variety to pollinize it. You will just have to try this variety to know how wonderful STREAMLINER really is. STREAMLINER is not going to take the place of MINN. 1166 (Evermore), but will be tough competition.

REMITTANCE

Remit by draft, post office money order, registered letter or your personal check; stamps may be sent for small orders. For the very best service send money orders.

Everbearer
Streamliner

BEARS 60 DAYS AFTER SET *Streamliner* Brings Sensational Results!

If You Will Follow These Simple Directions

Plant some STREAMLINER Everbearing Strawberry plants this spring as early as you can work the ground. For garden culture you may set them 1 foot apart in the rows, with rows 2 feet apart. For field culture, set them 1 foot apart in rows, and rows 3 feet apart. Set plants not too deep. Have ground just level with the crown of the plant. Start to cultivate a week later and cultivate every week thereafter till fall. A garden rake is the best tool to use in the small garden patch. Keep all blooms and buds picked off for 30 days, this will give the plant a good start. After 30 days, let them bloom, and you will be picking ripe berries within 30 days after they bloom; they will never stop till killing frosts in the late fall. For the largest crop, it will be well not to let each plant make over three or four runner plants. Nip the rest of them off. In the hot dry spells you should water the plants in the evening and a good soaking once a week is better than to sprinkle every evening. Be sure to break the crust that the soaking forms, the next day about noon. This is most important, because this will prevent the soil from drying out too fast. It also kills weeds before they have a chance to get started. Follow these simple directions and you cannot fail with STREAMLINER. These directions also apply to all the varieties of Everbearing Strawberries we list.

Minnesota 1166

Now Called "EVERMORE"

**At Last! An Everbearing Strawberry That Has Everything
Starts Bearing 60 Days after Set and Continues Bearing Till Heavy Frosts
3 CROPS IN 18 MONTHS!**

Minnesota 1166 is a large, long-pointed berry, produced on long-branched fruit stems, well hidden under the leaves for good protection. The color of the fruit is on the dark red order, and a solid red clear through the berry, even when the berry is still not quite ripe. The flavor is even better than the Wayzata everbearing, which up to now has always been the best flavored berry.

Minnesota 1166 is just as productive as any everbearing Strawberry we have grown, and makes a good quantity of plants. For best results in fruit production, we recommend that the runners be pinched off as fast as they appear in the summer. It's a strong grower, resembling the Missionary variety. The fruit is attached to a fine green hull that will not pull out even when the berries are dead ripe. This, with the small amount of juice this variety contains, will make

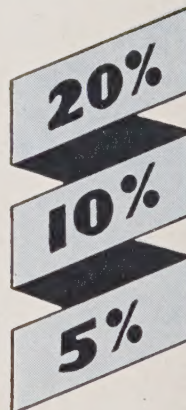

it the very best jam berry ever introduced. This variety has been known to keep five days without refrigeration, and never mold or spoil in the hottest weather. It will dry up like a raisin before it will spoil. This will make it the coming commercial variety, as most other everbearing varieties will not keep long after picking.

Minnesota 1166 berries shipped to the South Water Street market in Chicago this summer sold for \$7.50 per 24-pint crate. Once you have tasted Minnesota 1166 berries you will eat no other kind. We know, for we grow all the varieties and at our table we choose the Minnesota 1166 every time. We have 150,000 of them to offer and we are sure this will not go half way around, so send in your orders early, and take advantage of the discount we offer for early orders.

2 of the Better June-Bearing Varieties

NEW ROBINSON

Latest in Spring-Bearing Strawberries

MARVELOUS QUALITY. These big round blunt-pointed berries are of top quality. They are borne on large thick fruit stems, that are protected with a heavy foliage that makes up a wide fruiting and picking row. The tangy rich sweet flavor is found in no other Strawberry. Just imagine yourself ready to start working on the dish full of the berries at right. Solid red all the way through and full of rich red juice.

Robinson

LONG FRUITING SEASON. Robinson starts to ripen soon after Premier and continues right through the late Strawberry season. No let-up at all. Every berry a large one right up to the last picking. Bring a much higher price on the market, so it's the greatest money maker of all Strawberries. Sold for 50c a crate more than Premier.

HEALTHY FOLIAGE. The plants make a fine wide picking row, and foliage of the healthiest. Will grow on most any type soil, just so that it is well drained. This is the second year we are offering it to you and naturally our stock is somewhat limited. Not a diseased plant in the whole lot was found by the State Inspector. Our prices are reasonable, and would advise you to plant all you can afford to buy to get a start of this wonderful berry.

PREMIER

The Most Famous Berry Ever Introduced

Premier Strawberries sold as high as \$11.50 per 16-quart crate on the Benton Harbor, Mich., Wholesale Fruit Market.

If you plant STROMER'S PREMIER you will get the first berries on the market. They will be bearing heavily before other varieties begin. Your biggest picking will be when berries are in good demand and are bringing top prices. Premier will grow anywhere. The plants are sturdy and long rooted, a good drought-resister. The berries are very large, and hold their size to the last picking. The flavor cannot be beaten.

Be sure to order a few of our husky 2-yr.-old bearing-age BOYSENBERRY plants on page 14.

In Premier we offer you the greatest early Strawberry of all time. However, the early ripening of this variety is only one of its many good features. It is immensely productive and, unlike other early ripening Strawberries, the fruit produced by Premier is of the very finest quality, color, texture and flavor; and last but not least, every berry is large in size and uniform in shape. For every purpose that a Strawberry is wanted, Premier is supreme—eating, canning, preserving, distant and local market—no other variety can give you any more pleasure, satisfaction or profit. Premier succeeds everywhere and never fails to give a big crop of the very finest berries. The foliage is tough and healthy, and grows tall and rank, covering the blossoms and berries, and protecting them from frost and scalding sun.

Mastodon

Mastodon has been with us for about 20 years, and in all these 20 years we have never known them to fail on a full crop 5 to 6 months long the same year they are set out. The size of the berry is like Wayzata—very large. It is of very good quality, red all the way through, and fine flavor. Bears as heavy as Wayzata, and makes many new runner plants. These new runner plants will also bear toward fall, and then you have a real picking row. This wide row will make fine picking next June as a spring berry. Mastodon does not require any special soil, care or petting. They grow most anywhere, or on any soil that will grow garden or potatoes. They sell like “hot cakes” on roadside stands, or on any market. It will take a hard freeze to stop Mastodon from bearing. White frost will never hurt them at all. A field of Mastodon in full bearing in late November is a sight never to be forgotten. Even after a light snow one can go out and find ripe berries unharmed.

Senator Dunlap

Senator Dunlap is an old well-known variety that has made more dollars for berry growers than any other variety. It will grow most anywhere and on any kind of soil. However, it will do best on heavy, rich soil. If planted on light soil, be sure to set them 2 feet apart. On heavy soils set them 18 inches apart. Berries are dark red, firm, and sweet. Wonderful for canning and freezing as well as fresh.

GUARANTEE

We guarantee all of our nursery stock to be just as represented in our catalog; fully up to grade, of good quality, free from disease, and absolutely true to name; also to reach the customer alive, and in perfect growing condition. Furthermore, we will, at our option, either replace free of charge, or refund purchase price on any stock that arrives in bad condition; providing claim is made within 5 days from arrival of shipment, accompanied by a signed statement from the Express Agent or Postmaster at destination, showing extent of loss or damage. If any stock proves untrue to name it will, at our option, either be replaced free of charge, or purchase price will be refunded; but in no case will we be responsible for a sum greater than the original purchase price paid. Beyond this our liability ceases. It is understood and agreed between the customer and ourselves that the purchaser's order, and our acknowledgment of its receipt, shall constitute a mutual acceptance of the above terms and conditions.

Golden Queen

GOLDEN QUEEN RASPBERRY. A beautiful large, golden yellow Raspberry. Many prefer this fine variety to any of the reds or blacks, owing to its sugary sweetness and unsurpassed flavor. Should be in every garden, its beauty and high quality placing it at the head for table use. The canes are hardy, vigorous growers, and heavy croppers. Grows like a Red Raspberry and should be handled like one. Ripen with Latham. Our bearing-age plants will bear fruit this year. Both size plants will bear full crop in July, 1948.

GEM GIANT
EVERBEARER

Bears 60 Days After Planting

Gem differs a little from Wayzata and Mastodon in this way: Gem prefers a clay or a heavy sandy loam soil, where Wayzata and Mastodon do well on any kind of soil. Gem also does best when grown in the hill system, so for best results keep all runners nipped off. The berries are large and smooth, and of a light red color, that ripen up even all around. Bears equally as heavy as Mastodon, and the berries get larger towards fall. Runner plants will bear as well as the mother plant. Gem is a good plant maker. Makes a good June-bearing variety. Bears 3 crops in 18 months. Gem makes a beautiful quart of berries. Berries like these sell for 50c a quart around Thanksgiving and bring good prices all summer long.

SOUTH MICHIGAN NURSERY New Buffalo, Michigan

Giant Flowered Tuberous-Rooted BEGONIAS

Require very little care when planted in moist well fertilized soil, well shaded. Starts blooming in July, when planted in April or May. Blooms often as large as 5 to 6 inches in diameter. We offer the large double flowered CAMELLIA-FLOWER-ED type. Fine for mass planting, and borders in shady areas. May be started indoors in March or planted right outdoors in April and May. Also make good house plants. Will bloom all winter. We offer these in RED, PINK, YELLOW and BRONZE.

EVERGREEN THORNLESS BLACKBERRIES

Now we also have a THORNLESS Blackberry. This is the vine type Blackberry that is as smooth as a Grape vine. Fine for trellis or arbor. Also can be trained to climb up on any fence. Easy to grow. Fruit medium size, of very high quality. Beautiful cut-leaf foliage of the greenest of greens. That's why it's called EVERGREEN. Supply still limited. Not recommended for field culture or for commercial planting. 1-year-old plants, 3 for \$1.00; 10 for \$2.50. No Discount.

GARDENIA *Thornless Dewberry*

This is a new Dewberry of the Lucretia type and is absolutely thornless. Grows like any other Dewberry, it's hardy and thrifty. Why put up with the old thorny varieties, when you can grow our Thornless Dewberry, and save all this. Berries are larger and long, resemble the Blackberry, except that they are much larger, which will make them almost seedless. Ripen in July, and bear over a long period. Twelve plants will give you plenty of fruit for an average family. Grow them like a Boysenberry. Eat them fresh, canned or frozen. A pie made from fresh picked Gardenia is something to talk about. Plant stock limited. Order early.

Gardenia Prices: 1-yr.-old plants, 3 for 90c; 6 for \$1.50; 12 for \$2.50; 25 for \$4.50. 2-yr.-old, Bearing-age plants, each \$1.00; 3 for \$2.50; 6 for \$4.00; 12 for \$6.00. NO DISCOUNT.

CUMBERLAND

The Business Black Cap

This is without question one of the most profitable and popular Black Rasp-

berries ever grown. It is the one safe and reliable commercial variety because you can depend on a big crop regularly. We call it the "Business Blackcap" because it succeeds on all soils and produces its big crop year after year.

We have never known Cumberland to fail, and the best proof that it is a profitable variety is the fact that the demand for plants is greater every year and more

Cumberland are planted than all other varieties combined.

Cumberland is perfectly hardy and tremendously productive. The berries are extra large, glossy, black, and not equaled by any other variety in quality, flavor or appearance, except Logan. Whether wanted for market or home use, we can recommend Cumberland to our most exacting customers. Disease-free. Twice state-inspected plants.

Cumberland

POTOMAC →

Purple Cap

Potomac is the best of all the purple varieties, so we are growing only this variety. Potomac will bear you twice as much fruit as any black or red Raspberry we have to offer. A Potomac bush in full bearing looks like it is all fruit.

Hardly any leaves are showing. It's a cross between a Black Raspberry and a Red Raspberry. Introduced a few years ago by the U. S. Department of Agriculture. Fruit is a beautiful bright purple, large, firm, and of fine flavor all of its own. Add a few of these fine CERTIFIED plants to your collection for jams, jellies, to be used fresh, canned or frozen. Although Potomac is a Black and Red cross, it leans towards the Blacks, and is handled like one. It's propagated from tips. Should be pruned like a Black Raspberry. Plants are limited this year, so order early.

New!

SUNRISE

The **OUTSTANDING NEW RED RASPBERRY** originated by the U. S. Department of Agriculture has now been christened **SUNRISE**. It comes to fruit growers with many advantages over older sorts.

DR. DARROW and **PROFESSOR CLARK** describe the new berry in the U. S. Department Circular 397. It originated as a cross between Latham and Ranere. Among other things they say:

"Of most importance about **SUNRISE** from the standpoint of the practical grower perhaps are:

- 1—"HARDINESS and RESISTANCE to disease."
- 2—"EARLINESS and LARGER SIZE of the berry as compared with Ranere."
- 3—"BETTER TEXTURE and QUALITY of the fruit compared with Latham."

RED RASPBERRY

Extra early. Extra fine flavor. **SUNRISE** will grow and produce farther south than any other Red Raspberry known. Still it is perfectly hardy in all northern states, and some parts of Canada.

"In New Jersey, where **SUNRISE** has been grown commercially for a period of six years, it has been outstanding."

MR. BLACK, a prominent New Jersey fruit grower, writes June 12, 1942.

"Have picked **SUNRISE** twice from plants planted in the spring of 1941 and had fair picking from this one-year-old field. They brought 25c a pint. We do not think Latham will be ripe for 2 weeks as they are just shedding their petals. Have a good prospect for a heavy crop."

These comments from competent and practical men are evidence that this **NEW SUNRISE** will find an important place in Raspberry growing. It combines the most necessary characteristics of a successful berry—**HARDINESS—RESISTANCE to DISEASE—EARLINESS and HIGH QUALITY of FRUIT.**

SUNRISE has been under test and observation by the U. S. Department of Agriculture since 1923. We offer it to the general public at prices that are reasonable. The supply is limited. Place your order early.

LATHAM

Red Raspberry

Commercial Grower's First Choice

Latham is to Red Raspberries what Dunlap is to Strawberries. An old standby that grows anywhere on most any type of soil, and so hardy that it will stand 45 degrees below zero. Latham berries are large, often an inch in diameter. Best all-around berry to grow for a late red. Cans well, and fine for freezing. The plants grow large and tall. Holds the load of fruit well when trimmed back to 30 inches tall each spring. Plant Sunrise for real early, Latham for late, and Indian Summer or Washington for the late everbearing and you will have fruit all summer and fall.

Pfitzer's Juniper

This is one of the most popular Junipers. Spreading type, very hardy. Grows anywhere, even in shade. Wet or dry. Silvery green foliage. 18-24 inch plants, each \$2.50; 2-3 ft. plants, each \$4.00. Less Discounts.

Colorado Blue Spruce

Colorado Blue Spruce

No doubt the most beautiful and most popular evergreen of them all. A very hardy evergreen and works in most landscape work. Foliage greenish blue to silvery blue. The best color is in the spring when the new growth starts. Should be set in the full sunlight for best color. We have only small sizes to offer on these Colorado Blue Spruce. 10 to 12 inch, bushy trees, 3-year, twice transplanted, each \$1.10; 2 for \$2.00. 12 to 15 inch trees, each \$1.35; 2 for \$2.25. NO DISCOUNT

INDIAN SUMMER

MOST RELIABLE EVERBEARING RED RASPBERRY

INDIAN SUMMER

Everbearing

This new two-crop or everbearing Red Raspberry was introduced by the New York Experiment Station several years ago, and has been well tried out, and proven a success, both as a one-crop bearer, and also as an everbearer. The fall crop is borne on the new growth. The fall crop will start in September and continue till frost late in the fall. Berries are large, conical shape, firm, few seeds, and sweet. Fine shipping quality. The plant is a husky grower, perfectly hardy, and resistant to common diseases. Bears midseason to late fall. We offer both 1-year and 2-year-old plants in this variety.

NORWAY SPRUCE

At Prices That Are Very Reasonable

This is one of the easiest and fastest growing of all the evergreens, and also one of the most beautiful ones. The foliage is dark green throughout the whole season. It is so hardy and thrifty that it will grow anywhere—on high, dry, yellow sand, or on low ground where water will stand part of the year. For windbreaks that are the best, also for Christmas trees, as well as ornamentals. Makes a beautiful driveway when planted on both sides. Will stand trimming, and if the leader is cut out, can be formed into a round ball.

We are offering several sizes at prices that you will not want to pass up. We intend to sell our entire stock this spring, so this offer at these prices will not appear again in another year.

Spreading Yew

Boysenberry

WHITE BLACKBERRY

Strange as it may seem, this is a real creamy white Blackberry. Mixed with the jet black ones for dessert, it makes a most wonderful dish. The fruit is about the size of Alfred, with few seeds and quite sweet when fully ripe. The bushes are good, strong growers and very productive. This is not a worthless novelty, but a fruit of real value, and should be in every garden.

THORNLESS Boysenberry

All of the Good
Qualities of the Regular
Boysenberry BUT NO THORNS

This is the early ripening strain of Thornless Boysenberry with canes as smooth as a Grape vine. RIPENS TEN DAYS TO TWO WEEKS EARLIER THAN BOYSENBERRY. The introducer claims even heavier yields from this Thornless Boysenberry than the common Boysenberry. This new strain Thornless Boysenberry is identical to the Boysenberry except that there are no thorns and it ripens earlier. This is a very good feature as the early berries bring more money. The Thornless is just as hardy, rugged and heavy bearing as its parent, the Boysenberry. Vines grow 25 feet long, and this pretty apple-green vine loaded with giant purple beauties is a sight you will never forget, and after you taste a handful of them, other berries will go begging for a while. Delicious with cream and sugar, and when made into jam, it's the last word. Supply of plants still limited, so hurry.

GIANT *Hybrid*

CULTIVATED BLUEBERRIES

You can grow our Giant Cultivated Blueberries right in your garden. Mix a little peat moss, sawdust or leaf mold with the soil to keep it acid. May also use in a shrub border, as their dark green, waxy leaves turn bright red in autumn. Berries grow in clusters like small bunches of Grapes. Many berries as large as a nickel. Sweet and mild, with hardly any seeds like wild Huckleberries. Fruit ripens over several weeks' time, during the month of July. We advise planting TWO or more plants. Set 5 feet apart each way, and cultivate shallow, as their roots grow near the top. Our 3-year size

plants usually start bearing the next year after set, although this size plant has a few buds. We offer Jersey, Rancocas, and Rubel varieties. Let us select the variety best suited for your locality.

GRAPE CACO

This is the new quick-growing, young-bearing, delicious, sweet, big red Grape that is so popular. It has no equal as a home-use table Grape. It has a peculiar characteristic found in no other Grape, in that it is rich in flavor. Its deep, wine-red color is so pleasing to the eye. A vine full of these rich red beauties is a sight. Ripening in September as they do, the crop will be harvested long before killing frosts.

HORSERADISH ROOTS

This is the good old Bohemian Horseradish. Will grow any place from high light sand to rich bottom land. Grates up fine and tender. White as snow and strong as Samson. **Prices: Heavy roots, 3 for 35c; 10 for \$1.00. NO DISCOUNT.**

GOLDEN MUSCAT

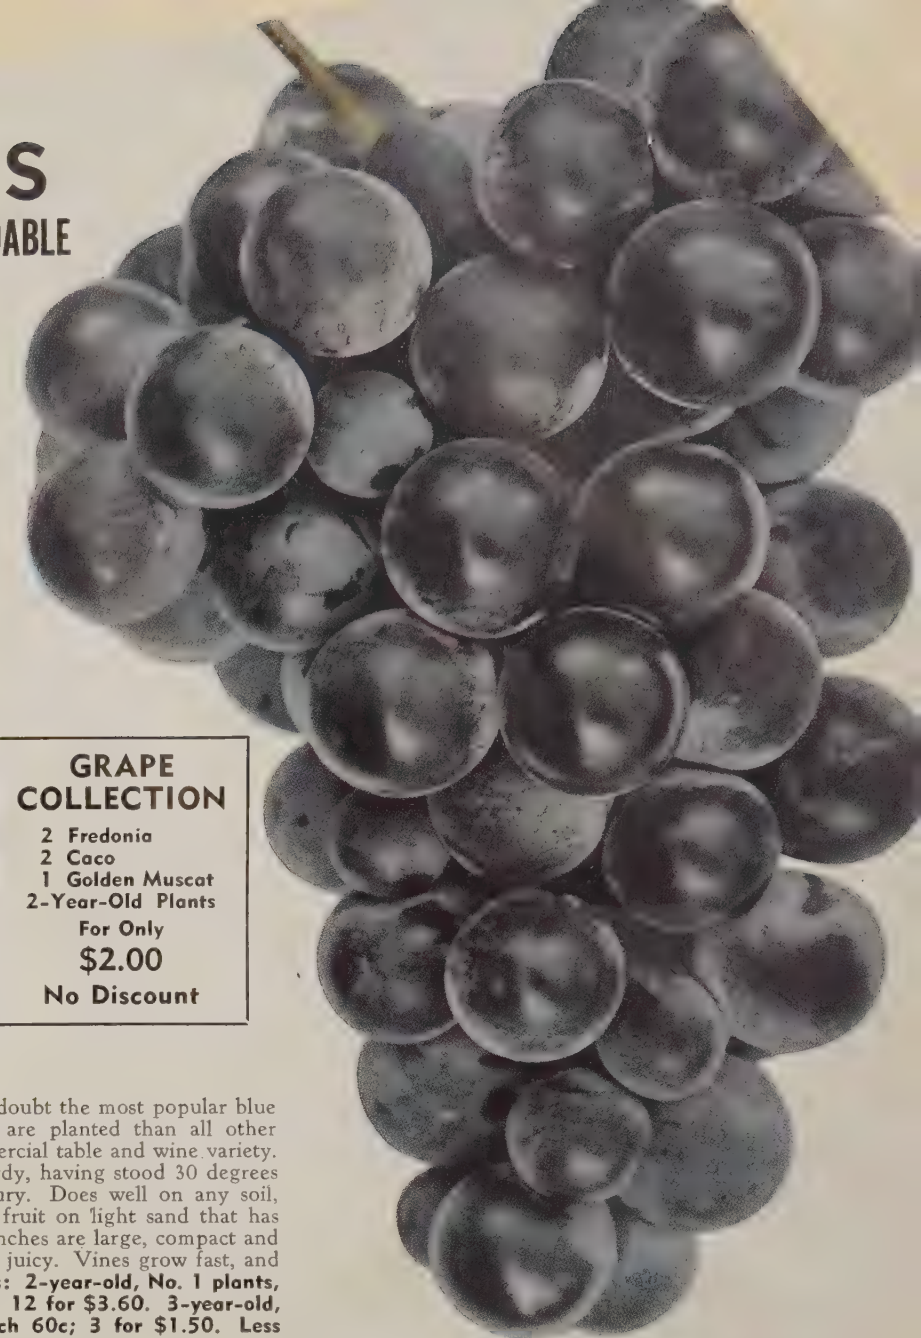

This new hardy California yellow Grape can now be grown anywhere, because it's hardy enough. The berries are large, and form a big, compact bunch that is very attractive. Quality is of the best, fruit being meaty with the Muscat aroma. Be sure to have at least one plant of this new variety in your garden or back yard, and be convinced. **Prices: 1-yr., No. 1, strong plants, each \$1.50; 3 for \$4.00. No Discount.**

BLUE HYDRANGEA

A rare plant of exquisite beauty, which will produce a fine crop of glorious blue flowers measuring 6 to 10 inches across. A few old rusty nails placed in the hole as you plant will assure them to bloom blue and stay blue. Or a teaspoonful of aluminum sulphate will do the trick also. **2-year-old, field-grown plants, each \$2.00. No Discount.**

CONCORD

Concord is beyond a doubt the most popular blue Grape. More Concord are planted than all other varieties. It is the commercial table and wine variety. Concord is perfectly hardy, having stood 30 degrees below zero without injury. Does well on any soil, but makes the sweetest fruit on light sand that has been well fertilized. Bunches are large, compact and well shaped. Sweet and juicy. Vines grow fast, and bear second year. **Prices: 2-year-old, No. 1 plants, each 40c; 6 for \$2.10; 12 for \$3.60. 3-year-old, bearing-age plants, each 60c; 3 for \$1.50. Less Discounts.**

NIAGARA

This is the great white Grape that succeeds most everywhere, even as far south as Florida. Bunches are nice, large, well shaped. Of a greenish white, turning to a light yellow when dead ripe. When fully ripe they are as sweet as honey. Vines are hardy, and bear young. **Prices: 2-year-old plants, each 40c; 6 for \$2.10; 12 for \$3.60. 3-year-old plants, each 60c. Less Discounts.**

SEEDLESS CONCORD

For you who cannot eat Grapes with seeds! Seedless Concord has the typical, rich Concord flavor. Dark blue skin overspread with attractive bloom. Large berries and bunches. Delicious to eat fresh, or made into juice and jelly. **Prices: Each \$1.50; 3 for \$4.00. No Discount.**

DELAWARE

This honey-sweet red Grape grows in small, compact bunches. Medium sized berries of the most excellent quality. Ripens with Fredonia. Vines are somewhat DWARFED, but vigorous and healthy. You should have a vine or two of these if not more. **Prices: 2-year-old plants, each 40c; 2 for 75c; 6 for \$1.80. Less Discount.**

FREDONIA

This new early black Grape was originated at the New York Experiment Station. No other Grape contains quite so much sugar as Fredonia. Bunches are large and compact. Very hardy, vigorous grower. Bears second year. Ripens 15 days ahead of Concord, and tops the market on account of its high quality. A few cents spent now for some Fredonia plants will be a lifetime investment, for which you will never be sorry.

SENECA

THE NEWEST THING IN GRAPES

This is not just another yellow Grape. It's different. It's early to ripen. Bunches are large, compact and tapering. Berries are oval in shape and sweet as honey, juicy, yet firm, and best of all, the skin can be eaten with the berry. SENECA can be grown anywhere on any soil. It's hardy and vigorous. Have only 500 plants to offer, so hurry up your order before we are sold out on them. **We offer 2-year-old, No. 1 plants at \$1.00 each; 3 for \$2.45; 10 for \$7.50. No Discount.**

PEACHES

The New REDHAVEN

Long before other early Peaches are coloring, **Redhaven** is flaunting its bright red-all-over dress! It colors beautifully, long before ripe, and can be picked and marketed at a high price, while still firm enough to ship well.

Redhaven ranks with the best Peaches in richness of flavor, fineness and firmness of flesh, quality, yield, hardiness, and dependability. It bears a full crop when other varieties fail.

It's a **freestone, self-pollenizing, extra early** Peach that will get the first high Peach prices, and bring extra profit for you.

Right at the beginning of the Peach season, when other early Peaches are still green, **Redhaven** Peaches are beaming from the tree like so many scarlet beacons! You can see them a great way off, and want to eat them even before they are soft! They get those first, eager, **big Peach dollars**, for they set their own price.

FAMOUS "HAVEN" FLAVOR

If you have grown and eaten **South Haven** and **Hale-Haven**, you have another treat in store when you taste **Redhaven**. It was originated by **Stanley Johnston** of **South Haven Experiment Station**, who also originated the other "**Havens**." But this tops them all, because it is so extra early, yet such a hardy variety, big bearer, and dependable cropper. A real, all-around Peach.

BRIGHTEST RED DRESS

Redhaven has the brightest coloring of any Peach. Looks like it's ripe 10 days or more before it's ready to pick. Peach growers have always dreamed of having a Peach that really had color, flavor, quality, quantity, and would ripen early enough to avoid price competition. **Redhaven** more than answers that dream. It is destined to stand with all the big-profit Peaches. A freestone, perfectly self-pollenizing variety. Get started with **Redhaven** this spring!

NO DISCOUNT ON REDHAVEN

HALE-HAVEN

Introduced by the **Michigan Experiment Station**. It is a cross between the **J. H. Hale** and the **South Haven**. Freestone. Yellow flesh. Firm. Excellent quality. Ripens last week in August. This is what we consider the very best Peach of them all. Trees are strong growers, and hardy. This variety will make you big money and should be planted extensively. No better variety ever introduced for canning and eating fresh.

HALE-HAVEN PRICES:

2-year-old, 9/16 inch cal., 4 to 5 ft. tall, \$1.25 each; 3 for \$3.00; 6 for \$5.50; 10 for \$8.95.

APRICOT

Our hardy Manchurian strain of Hardy Apricots are the only ones to try to grow this far north or as far north as Canada. Trees bear young and a full crop every year where Peaches can be grown. Beautiful golden yellowish orange color. **FREESTONE**, sweet and fuzzless. Eat them fresh, canned or dry. Make delicious pies or jams. Trees are **SELF POLLENIZING**. Will grow on most any soil that is well drained. Fruit ripens in late July.

NECTARINE

Lovely pink flowers in spring, on small, ornamental trees. Loads of deliciously sweet fruit in late summer! Smooth skin like Plums. Mellow, rich, juicy flesh like Peaches. Very fragrant and attractive. A treat for the family, whether served fresh or canned. Hardy as Peach trees, and self-pollenizing. **Prices: 2-year-old trees, each \$2.00. No Discount.**

ORANGE QUINCE TREES

Hardy, dwarf growing trees, seldom over 8 to 10 feet tall at maturity. Have shimmering pink blossoms, 2 inches across. Stiff, grey-green leaves. Fruit grows 2 1/2 inches across. It ripens to clear yellow. Delectable baked, dried, preserved, or made into jelly. **High in pectin**, it combines nicely with Apples, Raspberries, and other fruits. **3-year-old trees, each \$3.00. No Discount.**

MIXED IRIS

We offer a mixture of many colors: two-tones, and pastel shades of blues, yellows and solids. Many expensive varieties in this mixture. **Price: 3 for \$1.00. No Discount.**

PEPPERMINT (Mentha Piperita)

True Peppermint. Leaves and stems may be used for flavoring. Plant in low place, where water stands, or overflow from your outdoor pump. Must be grown in wet place to do well. **Price: 6 roots for 60c.** Six roots will spread and make plenty for average family.

VICTORIA RHUBARB

This giant stalked Rhubarb is the best that can be grown. It is tender, early, and has a mild acid flavor. Stalks are reddish green. Delicious for pies and sauce. We offer you nice size 2-year-old roots that can be cut this year. **Price: Each 25c; 3 for 65c; 12 for \$2.00; 25 for \$3.75; 100 for \$14.00. Less Discounts.**

Vest Pocket APPLES

5 Varieties All On One Tree!

This is not just a novelty but a wonderful idea where folks have just a limited space to plant trees. This **Vest Pocket** Apple tree will give you five varieties all on one tree. From early to late winter Apples. This combination is Double Red Delicious, Yellow Delicious, Dark Red Jonathan, Wealthy and Crimson Winesap, all budded on Yellow Trans-parent stock. This will give you five varieties.

We offer only the **SUPER-SIZE** trees. These are all 3 years old. Price: \$3.50 each. **NO DISCOUNT.**

Vest Pocket PEACHES

Just think of having a Peach tree with 5 different kinds of Peaches on it from early to late. Rochester, Hale-Haven, Redhaven, Elberta, and J. H. Hale. Peaches to eat and can from the first of August to September 15th. Be the first in your neighborhood to own one of these trees. We are limited as to space, so are showing only the Apple in full bearing.

We are offering 3-year-old, super-size trees at \$3.50 each. **No Discount.**

Vest Pocket PEARS

Most folks have only room for one Pear tree, and it's always hard to decide which variety to buy so they wind up by buying a Bartlett. Now it's possible to have 5 varieties of Pears all growing on one tree. Of course, one of the varieties will be Bartlett, and Clapp's Favorite, Seckel, Kieffer, Lincoln, and Bosc. This will give you Pears to eat from July to winter. Since Pear trees are a little more expensive to grow, we are asking \$4.00 each for these fine trees, but they are worth it. **Fine, 3-year-old trees, \$4.00 each. No Discount.**

JONATHAN

This is No. 2 Apple on the market. That is, Red Delicious brings the highest prices and sells the best, and Jonathan comes next. This variety cannot be praised too highly. It's solid red, good sized, firm, juicy, and keeps well. Its flesh is white and brittle with that tart tangy flavor that's in a class all of its own. Cast your eye on those two Jonathan Apples to the right. That's just the way they look when fully ripe. Sink your teeth into a tree-ripened Jonathan and the juice will squirt right into your left eye. If I had room for only one Apple tree, I would surely plant a Jonathan. Start to bear the fourth year after set, and bear every year. We have a 40-acre Apple orchard in bearing. Thirty acres of it are Jonathan. 2- and 3-year sizes available.

Jonathan

YELLOW TRANSPARENT

The finest extra early yellow Apple. It ripens in July and the season continues to September. Fruit medium size, and can be used for pies and sauce before entirely ripe. Flesh white, mild, juicy, and sweet. Trees grow upright, and can be planted at much less distance than most other varieties. Bears young and regularly. 2- and 3-year sizes available.

McINTOSH

McIntosh is a late fall Apple. The fruit is red, good size, with white flesh. We would say that it takes the place of the old-fashioned Snow Apple. It's an eating Apple. Trees grow fast and bear young. Not a winter keeper. 2- and 3-year sizes available.

YELLOW DELICIOUS

Winter. Comes into bearing early, producing heavy crops. Very thrifty, hardy, vigorous grower. A golden Apple which has won fame as an outstanding commercial variety. 2- and 3-year sizes available.

DOUBLE RED DELICIOUS

This variety is far superior to the common red Delicious as it is highly colored all around, with no green sides. Double Red Delicious is America's number one Apple. It tops the market every time, and seems to bear in a wide range of soils and climates. The fruits are very large, solid red, with the five points, and rather long in shape. Truly a most beautiful Apple, and the best eating Apple of them all. Flesh slightly yellow, with semi-sweet flavor. 2- and 3-year-old sizes available.

NORTHERN SPY

It's hard to beat the Northern Spy Apple for eating, cooking or any way you want to use it. Fine grain flesh, juicy, and mellow. Has a flavor that is found in no other variety. Trees grow upright, and make an excellent shade tree as well as a fruit tree. Why not plant one in the yard, and sit in the "Shade of the Old Apple Tree?" 2-year and 3-year size trees available.

ANOKA

No waiting for fruit if you plant Anoka. Hardy in all climates. The best early summer Apple of red color. Wonderful cooking Apple, as well as a tasty eating Apple. Mellow and juicy. Not tart. The trees of the Anoka variety are somewhat dwarfed on account of their early bearing qualities. We offer you strong, healthy trees in both 2-year-old and in the SUPER size. Order yours early, as each year we sell out of ANOKA long before the season is over. 2- and 3-year sizes available. **Prices above.**

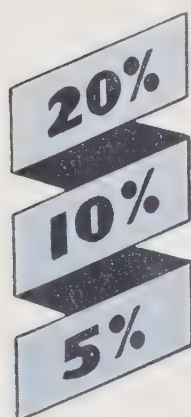

MONTMORENCY

This is about the best of the so-called Sour Cherries, or Pie Cherries grown. They are large, small-seeded, and sweeter than most varieties. Fruit bright red to dark red when dead ripe. Bears every year and often on 3-year-old trees. Can be grown successfully anywhere on most any type of soil. Can be grown where Sweet Cherries fail. Very hardy, vigorous grower. Best canning variety as well as best for freezing. **Prices: 2-year-old, each \$2.00; 3 for \$5.75. Less Discounts.**

WINDSOR

This is one of the best black sweet Cherries. Dark blackish maroon, firm, brittle flesh, small pit, and a good keeper. Hardy and yield abundant crops year after year. You need a tree or two of these in your back yard. Very scarce this year. Order early. **Price: 2-year-old trees, each \$2.50. No Discount.**

DOLGO CRAB

The perfect Crab. Hardy everywhere. Heavy bearer, usually beginning the year after setting. Jells perfectly even when dead ripe. A fine ornamental tree for the lawn as well as a wonderful commercial sort. Rapidly displacing such varieties as Transcendent and Hyslop. Bears young. **2-year-old trees, each \$1.75. Less Discounts.**

Dolgo Crab
(One-Half Size)

CARNATIONS

FIVE COLORS

All double. Big 1½- to 2-inch flowers with double and triple rows of petals, all fancy fringed. Spicy, lingering fragrance. Lovely grasslike blue-green foliage. Blooms all summer. Fine cut flowers. Ideal for borders. Five colors: Yellow, Scarlet, Pink, Dark Maroon, Light Red. **1 of each for \$1.50. No Discount.**

GIANT ALASKA DAISIES

Pure snow-white with yellow centers; Mayfield strain is the extra large growing kind, and are hardy. Hundreds of flowers on a plant, and will bloom nearly all summer. 1½ to 2 feet tall. This is a perennial, and will stay with you for many years, coming up every spring. **Field-grown, strong plants, each 35c; 3 for \$1.00. Less Discounts.**

GOLDEN OBLONG PUMPKIN

A few years ago we discovered this Pumpkin growing in a field of Hubbard Squash. The vine bore 30 fully developed and ripe Pumpkins. Resembles an overgrown ripe Cucumber when fully ripe. Grows about 1 foot to 18 inches long. Not over 8 inches in diameter, and one will make two or three pies. The finest grained Pumpkin in the world. Sweet and tender. Small seed cavity and thin skin. Grows anywhere, and will be ripe in 60 days after planting.

PRICES:

20c per pkg.

35c per oz.

\$4.00 per lb.

NO DISCOUNT

58-DAY HYBRID YELLOW SWEET CORN

This is the earliest and sweetest of all Sweet Corn. Ears 7 to 9 inches long. Stalk grows to medium height and several ears on one stalk, when planted in good garden soil. Big money-maker. Be the first one to offer Sweet Corn for sale this year. First Corn always brings 50c per doz. **Price:** 1/2 lb., 50c; 1 lb., 75c; 5 lbs., \$3.50, postpaid. **Less Discounts.**

CANADA RED RHUBARB

A brand new Rhubarb imported from Canada. Stems dark red clear to the heart and up in the leaf. Sauce made from our Canada Red will be as red as Strawberry jam. Skin so tender it can be cooked with the stem. Grows to a giant size. Stock still limited. We offer divisions as it cannot be grown from seed. **Prices: 2-yr. division roots, each 85c; 3 for \$2.40. No Discount.**

You can pull stalks from either 2-year or 3-year clumps this year.

ROCK-O-HONEY MELON

This is the last word in a Melon. It's a cross between the Honey Rock and the Hearts of Gold. They are large and hard as a rock, yet tender, sweet, and excellent flavor. Smallest seed cavity. Golden orange-yellow. You must try them. **Prices:** Pkg., 25c; oz., 50c; lb., \$5.00, postpaid. **No Discount.**

Mary Washington ASPARAGUS

There is no variety of Asparagus as good as Mary Washington, and whether for home use only or for market, you cannot afford to grow any other. This wonderful new Asparagus was developed and introduced by the U. S. Department of Agriculture, and although a recent introduction, it has become famous the country over.

Growers everywhere are discarding all other varieties in favor of Mary Washington, because it is earliest, the stalks are larger, more tender, more productive than any other variety.

Hansen BUSH CHERRY

The New Quick-Bearing Cherry. EASY TO GROW—SURE TO PRODUCE

Highly Productive—Good Flavor—Hardy Everywhere

Though the fruit of this new Cherry much resembles a Plum in size and shape, it comes massed in clusters and at times almost completely covers the limbs. The tree grows in a dwarf bushlike shape, rarely getting over 4 or 5 feet tall. Also of striking ornamental value.

Plant Hansen Bush Cherries Because:

- 1—They are so easy to grow and are perfectly hardy everywhere.
- 2—Are good to eat fresh, and make delicious preserves.
- 3—Bear from the ground up, early, heavily, and annually.
- 4—Are dwarf growing, bushy, and take up little room.
- 5—Excellent for hedges, ornamental shrubs and erosion control.

One of each of above for only \$3.00. No Discount.

DWARF APPLES

Old Folks Should Plant Dwarf Trees

Dwarf Apples are just the thing for small back yards and small places. Trees bear first and second year after set, and although they never grow taller than 5 to 8 feet, they bear standard size fruit. The supply of dwarf Apples is still limited, and it would be wise to order early. Please give second choice of varieties. We are offering the following varieties:

Double Red Delicious	Yellow Delicious	Jonathan
Cortland	Red Astrachan	Anoka
McIntosh	Northern Spy	Wealthy
Yellow Transparent		

PRICES: 2-year-old trees, each \$3.00; 3 for \$8.50; 5 for \$13.75.
NO DISCOUNT

DWARF BARTLETT PEAR

Fruit the same as standard Bartlett. Trees stay small, and bear second and third years after set. Hardy. Supply limited. Order early.

PRICE:
\$2.50 each. NO DISCOUNT.

STANDARD BARTLETT PEAR

Gets ripe in Peach season. The most popular home use and commercial variety. Large yellow with red cheek. Flesh white, tender and juicy. Bears every year and comes into bearing young.

PRICES: 2-year-old, 9/16 in. 4 to 6 ft. tall, each \$1.85; 3 for \$5.25. SUPER-SIZE, 11/16 in., each \$2.50; 3 for \$7.00. LESS DISCOUNTS.

Dwarf Bartlett Pear

Stanley Prune

STANLEY PRUNE PLUM

Large blue Prune type Plum. Sweetest of all Plums. Flesh is yellow as butter, and the pit falls out when broken open. Starts to bear young, and regularly each year. Needs no other variety to pollenize. Ripens early September. Wonderful shipper and keeper. Eat them fresh, can them, or freeze them, and you will have the best. Supply of Stanley Prune trees limited this year. Order early.

PRICES: 9/16 in. caliper, 4 to 5 ft. tall, 2-year-old, each \$2.00; 3 for \$5.75. **SUPER-SIZE**, 11/16 in. and up, each \$2.95. **LESS DISCOUNTS.**

GREEN GAGE PLUM

Famous large green dessert Plum with that sweet-tart flavor! Fine, juicy, firm flesh. Holds up for canning and shipping. Trees bear young, are hardy, and excellent producers.

PRICES: 9/16 in. caliper, 4 to 5 ft. tall, 2-year-old, each \$2.00; 3 for \$5.75. **SUPER-SIZE**, 11/16 in. and up, each \$2.95. **LESS DISCOUNTS.**

Santa Rosa

SANTA ROSA PLUM

Big heart-shaped red Plum of superior quality. Bears young and heavily each year. Fine eating and canning Plum. Supply limited this year.

PRICES: 2-year-old, 9/16 in. caliper only, each \$2.00; 3 for \$5.75. **(NO SUPER-SIZE.) LESS DISCOUNTS.**

RED GIANT

MOST BEAUTIFUL PLUM IN THE WORLD

Clusters of 7 to 12 mammoth beauties on the end of each branch! Fruit often measures 2½ to 3 inches long. Roundish oblong in shape. Ripening evenly, Red Giant Plums attain a deep, glowing maroon-red color, thickly overspread with pink bloom. No other Plum like it! Flesh is greenish yellow, very firm, fine and sweet. Wonderful shipper and canner. Not easily bruised in handling. **Price:** 2-year-old trees, each \$2.00. **Less Discounts.**

Thor

PHLOX—Continued

PHLOX COLLECTION No. 5

Fine, large, field-grown HARDY Phlox, same size as offered above.

- 1 Thor
- 1 Rosenberg
- 1 Von Lassburg
- 1 Caroline Vandenberg
- 1 Border Queen
- 1 Leo Schlageter

For Only **\$2.00** NO DISCOUNT

CAROLINE VANDENBERG. Most beautiful lilac-blue. So dainty and sweet scented. No other variety like it. You must see it.

BORDER QUEEN. The finest pure dainty pink. One of the largest flowered Phlox. Strong grower, and sweet scented.

LEO SCHLAGETER. Scarlet-carmine, with an orange cast. The finest large blooming red variety in existence. Sweet scented.

PRICES: Strong, 2-year-old, field-grown plants, sure to bloom this year, each 50c; 3 for \$1.35; any 10 for \$3.95. No Discount.

BIOTA AUREA NANA

(Golden Arbor-Vitae)

This beautiful evergreen, with its yellowish green color, is ideal for a contrast in your landscape planting. Its golden green sheaths start broad at the base and taper to a blunt point. Compact grower, and will stand shearing to keep it that way for many years. Slow growing, and will never be out of place. One set on each side of your front or back door makes a beautiful setting, or planted on inside or outside corners around your house.

PRICES:

24 to 30 inch trees. B&B Specimens.

Each \$3.00
2 for 5.50
NO DISCOUNT

HOLLYHOCKS Chater's Double Mixed

Flowers from 3 to 5 inches across. DOUBLE. Thickly clustered up and down 3- to 5-foot stems. Ruffled double flowers come in red, yellow, pink, and many other colors. Cut stems after they bloom. New plants will come up each year and bloom for years. Strong, 2-year-old, field-grown plants, each 45c; 5 for \$1.60. No Discount.

HARDY PHLOX

Newest and Largest Varieties

None prettier than the selection we offer you. All are sweet scented, and grow from 18 to 24 inches tall. Flower heads 5 to 8 inches long, and will bloom all summer after they start, which is usually July 15th. Our plants are large, field-grown, and bloom six weeks after set. Plant in April or May.

THOR. One of the prettiest Phlox of them all. Salmon-pink, large trusses, good, strong grower. Sweet scented.

ROSENBERG. Deep violet-cerise, with slightly deeper center. Vigorous grower, and sweet scented.

VON LASSBURG. Pure white, and free bloomer. Strong grower. Grows 24 in. tall. Sweet scented.

TRITOMA

Extra fine garden perennial. Easy to grow. Blooms August to October. Price: Each 55c; 3 for \$1.45. Less discount.

HARDY ASTERS

BLUE LAGOON

A charming variety of the Novi-Belgi type, with beautiful large, lacy, blue flowers, with yellow centers. In early September the 2- to 3-foot, bushy plant will be completely covered with bloom, lasting into late fall, to be killed with hard freezes. Plants last for years.

Large clump, field-grown plants, each 50c; 3 for \$1.45. Less Discounts.

PALMYRA

Best pink of the Novi-Belgi type. Pure pink, with yellow center. Most delicate of the pink varieties. The 3- to 4-foot plants come into bloom in early September and bloom to hard frosts. Plants last for years.

Large, field-grown clump plants, each 50c; 3 for \$1.45. Less Discounts.

CHINESE LANTERN PLANT

This perennial plant is not so much to look at all summer, but towards fall it will become loaded with the most dainty, Chinese-lantern-shaped seed pods. Pods are about an inch across, and of the most delicate orange shade. After the first frost the leaves will drop off, and the bare stem will be loaded with these lanterns. These make the most beautiful dry winter bouquets you ever saw. Lasts all winter. (Actual picture) showing plant just before a frost. Plants will multiply themselves. **Bloom-ing-size plants, each 25c; 5 for \$1.00. No Discount.**

Old Fashioned BLEEDING HEARTS

This lovely hardy old-fashioned plant is loved by all. Lives for years and comes forth each spring, right after the snow goes off, with its long arching stems, loaded with dainty heart-shaped flower pendants. Rosy red, pale yellow centers. All stems do not appear at once. Will bloom over a 6-weeks period. Plants are very hardy, and can be divided every three years. Plants go dormant in June in time to plant annuals like Zinnias or Marigolds. **Price: Large, field-grown clump plants, each 75c; 3 for \$2.00. No Discount.**

GYPSOPHILA, Bristol Fairy

This is the dainty double white "Baby's Breath," which is the common name for it. This is a perennial. Hardy and free bloomer. Ideal for a bouquet filler. Plants will be loaded with dainty pure white, double snowflakes. Grows 18 to 24 inches tall. Taller with better care. **Blooming-size plants, each 50c; 3 for \$1.35. Less Discounts.**

We also have the same thing in the single flowers at 30c each; or 4 for \$1.00. Less Discounts.

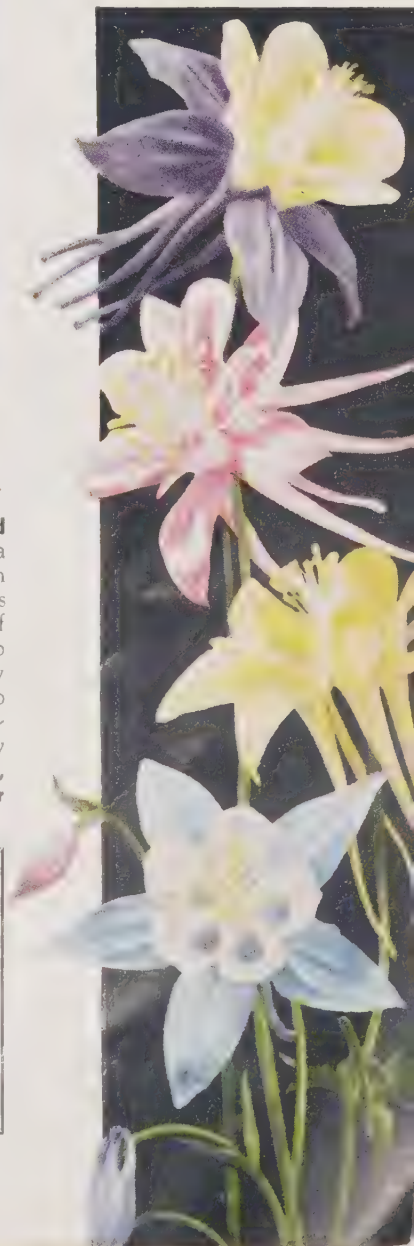

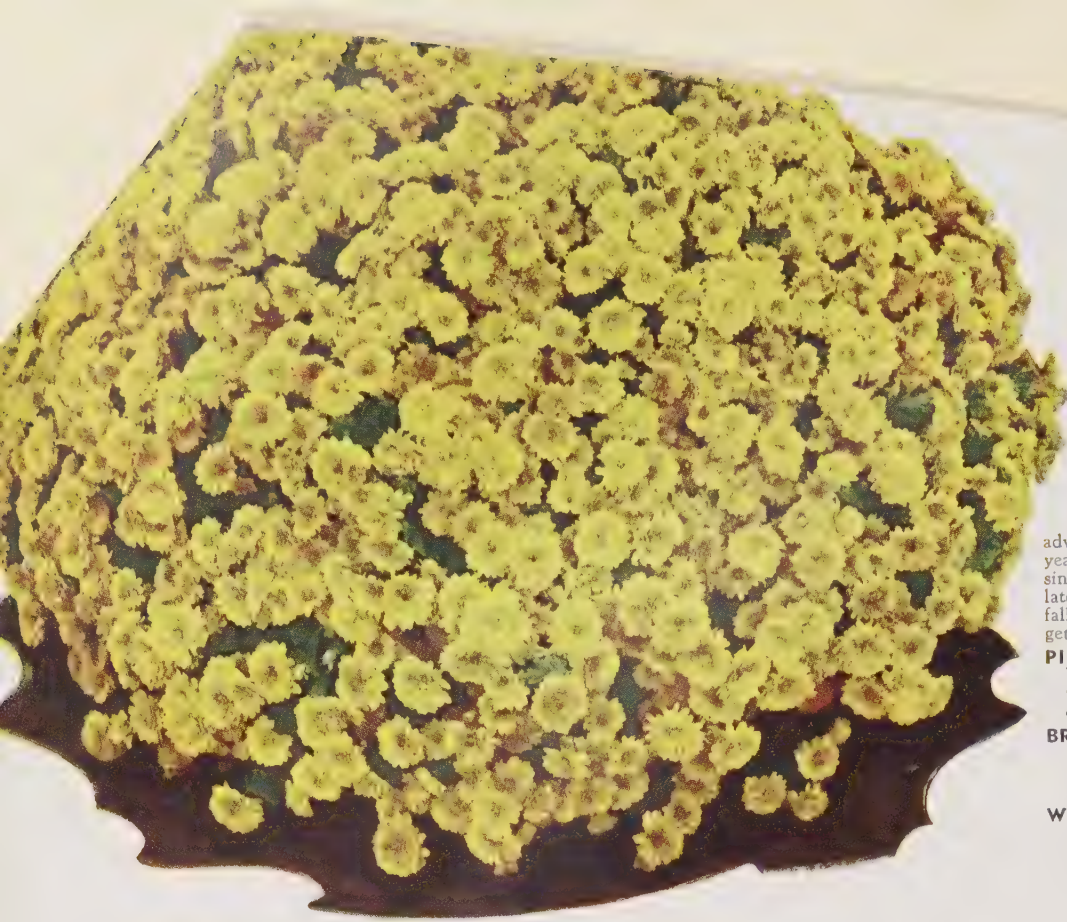

Gypsophila

AQUILEGIA

Mrs. Scott Elliott's Long-Spurred Hybrid variety. They come in a wide range of pastel colors, both two-tones and solid colors. Plants form a large clump with dozens of flower stems each season. Comes up every year and lasts for years. May be divided when plants become too large. A favorite garden and bouquet flower. Easy to grow on any soil. **Strong, field-grown plants, each 35c; 5 for \$1.50; 10 for \$2.75. Less Discounts.**

CUSHION MUMS

5 CHOICE COLORS

These are the famous Cushion-Type Mums that are so widely advertised. Our large plants will bloom this year and every year for a good many years to come. 500 to 1000 blooms on a single plant, often the same year planted. Starts to bloom late in July, and heavy frost is all that will stop them in the fall. Ideal for landscape work, and borders. Single plants will get as large as a bushel basket, and produce a bushel of flowers.

PINK CUSHION. Dainty pink. Strong grower. Hundreds of blooms first year. Hardy, and will last for years. **Strong, field-grown plants, each 45c; 3 for \$1.10. Less Discounts.**

BRONZE CUSHION. Rich bronze mound of beauty. Blends well with autumn colors and other color Cushion Mums. **Strong, field-grown plants, each 45c; 3 for \$1.10. Less Discounts.**

WHITE CUSHION. Pure white as the freshly drifted snow. Strong grower and early bloomer. **Strong, field-grown plants, each 45c; 3 for \$1.10. Less Discounts.**

YELLOW CUSHION. Bright yellow, with darker yellow centers. Larger individual blooms than other Cushion Mums. Ideal cut flowers for table decorations, where short stems are sufficient. Hundreds of flowers the first year. **Strong, field-grown plants, each 50c; 3 for \$1.35. Less Discounts.**

SANTA CLAUS, RED CUSHION. The most brilliant of all Cushion Mums. Large, red, double blooms with yellow centers. Another fine cut-flower variety. Any of these five Cushion Mums are an ideal plant to plant on or around graves, as they will stand more abuse and neglect than any flower you could use. Hardy and blooms every year. **We offer strong, field-grown plants, each 50c; 3 for \$1.35. Less Discounts.**

GAILLARDIA

BURGUNDY. Red. A large, full flower of dark burgundy-red with self colored center, highly tufted. Profuse bloomer throughout summer and fall. **Blooming-age perennial plants, each 35c; 3 for 90c, postpaid. No Discount.**

MIXED GLADIOLUS

Rainbow Mixture

Our mixture of Gladiolus that we offer you is made up of 10 or 12 varieties of choice pinks, reds, whites, lavenders, two-tone pinks, yellows, and many of them ruffled. All strong, tall growing, cut flower varieties. You will be delighted when you see them bloom, and at the price we ask, you will say it was a rare bargain.

BLOOMING-SIZE BULBS. Every one will produce a tall spike this year. **25 for \$1.25; 75 for \$3.00; 100 for \$3.50. No Discount.**

EXTRA LARGE SIZE BULBS. Many will produce more than one spike this year. **12 for \$1.25; 25 for \$2.00; 100 for \$7.00. No Discount.**

HIBISCUS

(Mallow Marvels)

2 Colors— Red and Pink

This giant flowering Hibiscus is the best strain of them all. Often on good soil will grow 6 to 8 feet tall in one year. These

will be loaded with these large bell-shaped flowers. Plants last for years. Fine for landscape work, planted by the garden fence or wall, either in front or back of the wall or fence. **We are offering strong, field-grown plants at 35c each; 3 for \$1.00; 10 for \$2.95. Red and Pink. State color wanted.**

PACIFIC HYBRID DELPHINIUM

Gorgeous double, large-flowering strains. Solid blues, pinks, lavenders, and many two-tones. Flower stems often reach 4 to 5 feet, loaded with giant flowers from top to bottom. **2-yr.-old, blooming-size plants, each 50c; 5 for \$2.00; 10 for \$3.75. Less Discounts.**

Delphinium

RED SILVER FLOWERING CRAB

← This remarkable new lawn and landscape tree is red and silver. The leaves on the top side are red, and silver on the under side. What a beautiful sight when a gentle breeze stirs this tree. Red and silver. Even the bark of this tree is red. Next comes the reddest buds, that will open up into a little lighter red bloom, that will completely cover the tree. Does not bear fruit. We believe RED SILVER is the best of the Flowering Crabs, since it is perfectly hardy, and a free bloomer. You will like this tree.

PRICE:

**2-year-old, 7/16 in. cal.,
3-4 ft. tall, each \$1.25;
2 for \$2.25.**

**2-year-old, 11/16 in. cal.,

Pure blue, tall growing, with long spikes.
Price, each \$1.00.

LESS DISCOUNTS.

One of each of these 4 beautiful colors in strong,
2-year-old, field-grown plants, for only \$2.85.
NO DISCOUNT.

European Mountain Ash

Our most gorgeous ornamental shade tree! Clusters of small white blooms are followed by large clusters of orange-red berries which remain all winter. Heavily clothed with dark green pin-nate leaves, which color yellow and violet in autumn. Shapely oval head. **Price: 5-6 ft. trees, each \$2.50. No Discount.**

American Sycamore

Often called Planetree. Large, handsome leaves, smooth light colored creamy white bark with age, gives tree a striking appearance. One of the best shade trees. **5-6 ft. trees, each \$2.00. Less Discount.**

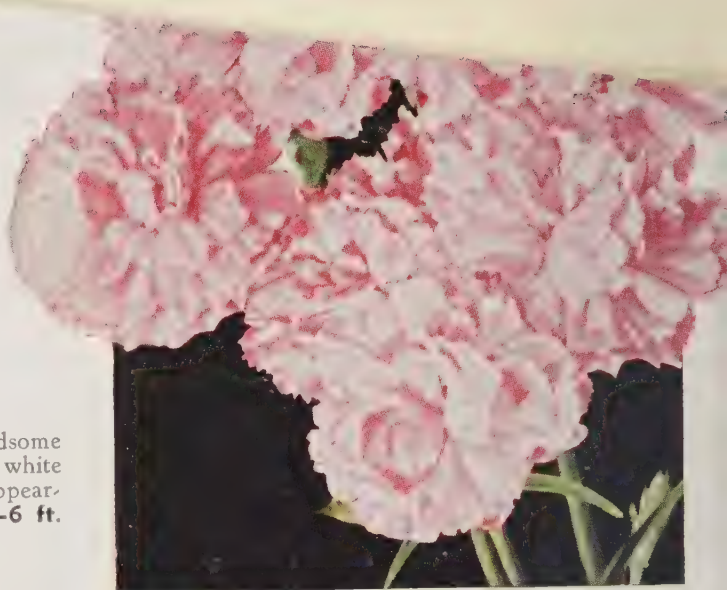

Silver Maple

(*Acer Dasycarpum*)

Very hardy rapid growing native tree, valuable for producing quick shade. Good sized, rather deeply and irregularly indented leaves, which turn yellow and bronze in the fall. **6-8 ft. trees, each \$2.00. Less Discounts.**

Niobe Weeping Willow

This is the yellow bark Weeping Wil-low, with the long, drooping branches, that dresses up a yard so beautifully. Also fine for rock gardens, along the bank of a stream or lake. Very hardy. Will grow on high ground or in water. **Prices: 5-6 ft. trees, each \$2.00. Less Discounts.**

Princess Beatrice

DOUBLE CARNATION

Enchanting fragrance! Each stem is a complete bouquet! These lovely frilly cameo-pink blooms come in large clusters. Buds and open flowers on each stem all at one time. **BLOOM ALL SUM-MER.** Hardy perennial plants, grown from cuttings. **Well rooted, blooming-age plants, 2 for \$1.00. No Discount.**

Lombardy Poplar

A tall, shaftlike column that grows quickly. Makes a fine effect planted along driveways. **5-6 ft. trees, each \$1.00. Less Discounts.**

Hydrangea Pee Gee

Flower panicles 6 to 10 inches long, and almost as wide! Delicate pinkish white, turning rose in fall. Can be dried for winter bou-quets. Shrub grows 3 to 4 feet tall. Trim as desired. Ideal for foundations, groups, borders. Plant these shrubs 2½ feet apart. **2-year-old, blooming-age shrubs, each 75c; 3 for \$2.00. Less Discounts.**

Pink Flowering Almond

Dainty, one-inch, bright pink "May Roses" cover every inch of the stems and branches on these lovely shrubs! Bloom early in May. Low-growing bushes, desirable for small yards and bungalow plantings. **2-year-old, blooming-age bushes, each 75c; 3 for \$2.00. Less Discounts.**

Spirea Van Houttei

One of the most common but still one of the most beautiful of all shrubs. So easy to grow. The branches covered with small white blooms will droop gracefully to the ground, and it is sometimes called Bridal Wreath. Blooms early spring.

PRICES:

3-year-old plants, husky, 18-24 in. tall, each 35c; 3 for \$1.00; 6 for \$1.80.

3-year-old, 2-3 ft. tall, each 50c; 3 for \$1.35; 6 for \$2.40.

4-year-old, 3-4 ft. tall, each 65c; 3 for \$1.80; 6 for \$3.00.

LESS DISCOUNTS.

Pyramidal Arbor-Vitae

Dark green foliage, hardy, tall growing, fan-like foliage, stands part shade or full sun. Fine for planting on each side of the doorway or in corners. We offer fine, field-grown trees. **18-24 in. tall, each \$1.25; 2 for \$2.00. 2-3 ft. tall, each \$2.50; 2 for \$4.50. Less Discounts.**
